### **Lincoln company takes Gold at prestigious regional business awards**

GAME Engineering, a Lincoln-based manufacturer of animal feed, pet food, grain & seed and biomass industries established 30 years ago, has seen its custodial division (now the market leader in providing security doors, gates, windows, grilles and custom products to the Prison Service) win regional recognition at this year's prestigious **EEF Future Manufacturing Awards**.

GAME Engineering, which employs 70 staff, won the Outstanding Export Award. This award recognises manufacturers that have successfully developed and implemented a new international trade strategy. GAME demonstrated their unique methodology to make custodial accommodation in modular form and export it overseas. Having already successfully provided this to the Falkland Island Government, they are now working with several other countries including Diego Garcia, Turks and Caicos Prison, the Spanish Prison Service, Latvia, Lithuania and Estonia.

GAME Engineering was up against stiff competition from a range of innovative businesses - small and large - from across the region. It was selected by a panel of judges drawn from business leaders, industry experts and academics after impressing them with their blend of design, manufacturing and project management that has driven export success.

With the regional title now secured, GAME Engineering will now go on to compete for the national title at an awards gala dinner in London in January next year.

**Stuart Hasler, Custodial Director at GAME Engineering, says:** "This award is testament to our hard working and dedicated team, and we are delighted to have won. It puts us on the map as a modern and innovative company and goes some way to demonstrate the valuable contribution made by local manufacturers, like ourselves, to our region. We can't wait to share this news with all our staff, customers and suppliers.

"It's fantastic to get this far and now we're all looking forward to the national finals in January to see how we measure up against the rest of the UK."

**Charlotte Horobin, Midlands and East Region Director at EEF, says:** "By accessing new markets and discovering new trading partners manufacturers can grow and improve their long-term prospects. GAME Engineering fully deserves this award for the amazing work that they are doing in this highly competitive field. We wish them the best of luck for the national finals."
