

# GAME ENGINEERING LTD

---

## MATERIALS PROCESSING & HANDLING ENGINEERS

UK COMPANY

# OUR EXPERIENCE IS YOUR GUARANTEE.

GAME Engineering has a unique and proven ability to deliver innovative and imaginative processing, packaging, storage and handling solutions. GAME Engineering works within a range of sectors from animal feed, pet food and grain and seed processing to human food waste recycling and fuel generation. Our engineers pride themselves on providing a specialist bespoke service – on time and within budget.

Wood Chip Rotary Drum Dryer Installation

30 YEARS  
AT THE  
VERY TOP  
OF OUR  
GAME

From humble beginnings...

1986

Grain And Milling Equipment (GAME) is founded by Peter Ablewhite, Tony Kirk, David Whyte & Keith Russell in offices in North Scarle, Lincolnshire.

1990

Relocation to a six acre site, in Witham St Hughs, building bespoke offices and manufacturing facility.

1996

Awarded first £1 million contract.

1999

Granted Home Office approval for HM Prisons & Police grill and cell door manufacture and installation. The custodial fabrications department is launched.

2003

Offices and workshop extended to cater for growth in custodial and security division.

2010

GAME undergoes a rebrand following the growth of the company.

2013

Record growth. Awarded £3 million + contract recruiting new staff members to form an 80 strong team based at Lincoln.

2015

Obtained CE marking certification for steelwork manufacture.

2016

Celebrating 30 years in business in 2016.

...to celebrating 30 years of business in 2016

## OUR SERVICES

Our professional experience is invaluable in developing materials processing and handling projects within turnkey design and plant solutions. A dedicated team of project managers work with team leaders, highly skilled tradesmen and fabricators to implement cost-effective solutions to deliver projects within quoted budgets.

We offer a bespoke service to all our customers helping them meet project requirements. We also offer advice on system concepts and the design and supply of processing equipment. Some of our key services include:

- Site Surveys
- Process Design Engineering
- Project Management
- Site Management
- Bespoke Machinery Manufacture
- Site Installation and Commissioning
- Turnkey Process Solutions
- CAD
- Steelwork designed and manufactured to BS1090 & CE marked
- Mechanical handing system design
- Bulk storage system design

GAME provides a wealth of experience and expertise, helping customers to develop process materials handling solutions, future proofing the production requirements of your business, while at the same time maximising the return on your investment.

To ensure minimal business disruption we work around our customers existing production, resulting in full operational capacity with minimal downtime.

Our experience is your guarantee.

## OUR PRODUCTS

Originally specialising in the resale and installation of used and reconditioned feed milling equipment, we quickly expanded into projects requiring new and custom made equipment. This led to the manufacturing of our own range of GAME machinery, for a variety of industries from pet food production through to conveying and handling systems in aggregates and plaster board manufacture.

We manufacture our own range of products for all materials handling industries to suit our customers specific requirements and processes. Our products include:

- GPM Paddle Blade Mixers
- Belt & Bucket Elevators
- Ribbon Blade Mixers
- Screw Conveyors: Tubular & U-trough
- Diverter Valves
- Chain Conveyors
- Micro-Ingredient Units
- Rotary Sifters
- Self Clean Elevator Boots
- Holding Hoppers & Storage Bins
- Slide Valves
- Bespoke Fabrications

To complement our own range of products, additional equipment is sourced as required for inclusion into projects to ensure a full customer service, including:

- Extruders
- Vacuum Coaters
- Dryers & Coolers
- Pellet Presses
- Weighing & Dosing Systems
- Shredders
- Metals Removal
- Sizing & Grading Equipment
- Dust Extraction & Control
- Pneumatic Conveying Systems
- Compressed Air Services
- Liquid Additions
- Electrical Site Wiring, Panels and PLC Control Systems
- SCE Single & Twin Skin Bin Packages

## SECTOR EXPERTISE

GAME Engineering has a proven track record of developing and delivering engineering projects for the Animal Feed, Pet Food, Grain and Seed, Biomass Handling and Fuel Generation, Waste Recycling, Human Food and many other industries.

GAME Engineering has worked with some of the UK's leading companies, such as Drax Power Ltd, Mars Horsecare UK Ltd and British Sugar, to name a few.

### ANIMAL FEED

Regarded as one of the UK's leading materials processing & handling engineering companies within the animal feed sector. GAME's ability to meet and exceed the requirements of feed manufacturers' results in us offering services to improve the processing in animal feed mills.

#### PAST PROJECTS

- New Production Plant
- Pellet Press & Conditioning Installation
- Micro-Ingredients Additives System
- Liquid Coating System
- Raw Material Storage System
- Cooling Systems
- Screening Systems
- Upgrading Pellet Lines

### CASE STUDY HEADING

### GRAIN AND SEED

After three decades of working within the industry, many of the leading grain storage and processing companies are turning to GAME for their knowledge of providing project-based solutions. The expertise that GAME holds, means we can offer services to meet individual client requirements.

#### PAST PROJECTS

- Cereals Intake & Transfer System
- Bird Seed Intake and Cleaning
- Seed Plant Production
- Colour Sorter Installation
- Grass Seed Pre-Cleaner Installation
- Linseed Seed Treating Plant
- Seed Cleaning Plant Upgrade

### INDUSTRIAL / WASTE RECYCLING

GAME has accrued a wealth of knowledge and experience which has been implemented into a variety of projects. GAME's experience in turnkey solutions means that we can offer services to design & construct new plants, or upgrade, refurbish, extend or improve existing processing facilities.

#### PAST PROJECTS

- SkipWaste Sorting Line
- Materials Recycling Facility (MRF)
- Can Sorting Plant
- WEEE Shredding Line
- WEEE Process Line
- Plastics Auto Sorting System with Colour Separation

### PET FOOD

The market leader in building new pet food extrusion plants. As well as major plant extensions, our team of engineers work towards implementing individual project requirements, working efficiently to provide a cost effective solution.

#### PAST PROJECTS

- Transfer Routes to Packing
- New Production Plant
- Extra Extrusion Line
- Relocate and Install Packing Machinery
- Process & Packaging Extruder Plant
- Weighing & Blending System
- Live Bin Installation
- Fines Screening System

### BIO MASS HANDLING / FUEL GENERATION

GAME designs, manufactures and installs solutions in the biomass, renewable and alternative fuel sectors. We have become leaders in innovative biomass handling solutions, offering full turnkey package services including design and construction, as well as upgrading existing processing plants to our customers specifications.

#### PAST PROJECTS

- Bio-Fuels Storage Area and Feed System
- Wood Chip Intake System
- Biomass Platform Design
- Biomass Intake & Storage
- Fire Damage Repairs
- Wood and Straw Pelleting Plants
- Wood Pelleting & Briquetting Facility

### HUMAN FOOD

Working with you, GAME aims to keep your uptime to a maximum, we are used to working round the clock and alongside existing production facilities in strict hygienic conditions. We process engineer the solution to ensure our customers receive the maximum return from investment and gain the competitive edge.

#### PAST PROJECTS

- Granola Production Line
- Intake & Screening Installation
- Materials Blending System
- Replace Screening Tables
- Intake & Transfer System
- Raw Material Storage System
- Plant Relocation
- Flour Handling System

*GAME's Project Engineers have consistently proved to be a customer-focused, highly professional team and have been a valuable asset in driving forward our projects...*
